Product Description

Polyvinyl Chloride Homopolymer having high molecular weight, is white and free-flowing resins produced by suspension polymerization process. The resin can easily blend with variety of additives to achieve desired qualities needed in many applications. The medical grade PVC resin is developed for medicals application which more concerned about health safety.

Typical Application                     Product Characteristics                     International Compliance
Medical flexible film & sheet, flexible devices, nasal tube, blood tube, blood bag.                     Very Low Fish Eye                             REACH Compliance, EU
                                                   Good Thermal Stability                         Biological Testing, Japan

* Corresponding Polymerization Degree = 1300

Processing Guidelines

PVC resin needs to be compounded with the properly additives by using standard mixing techniques. The optimum processing condition for each convertor depends on the formulation and the machine. Generally, the processing temperature is 120 to 170°C for soft products and 170 to 210°C for rigid products.

Product Technical Assistance

For technical assistance or further information on this product or any other SCG Chemicals' products contact your SCG Chemicals technical service at the address or telephone number as specified below.

Product Available Form          Product Packaging
White Powder                   Paper Bag 25 Kilograms
                                    Flexy Bag 550 and 1,100 Kilograms
                                    Tank Car 10 and 20 Metric Tons
                                    Sea Bulk 17 Metric Tons
Storage
- Use with adequate ventilation. Avoid contact with eyes and skin. Good housekeeping measures should be used and accumulations of materials should be removed from settling areas.
- Polyvinyl Chloride can acquire a substantial static electrical charge. Handling and processing equipment should have an electrical grounding.
- Store and handle in accordance with all current regulations and standards. Container tightly closed and properly labeled. Store in a cool, dry area. Store in a well-ventilated area. Avoid heat, flames, sparks and other sources of ignition.
- Arrange product properly and correctly methods. For more information, please see "PVC User manual"

Safety
- The product is not classified as a hazardous material.
- Please see our Material Safety Data Sheet for details on various aspects of safety, recovery, and disposal of the products, for more information contact your SCG Chemicals technical service.

Recycling
- The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
- Please see our Material Safety Data Sheet for details on various aspects of safety, recovery and disposal of the product, for more information contact your SCG Chemicals technical service.

Related Documents
- The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
